

*Industry leader  
in thread  
supervision  
services*

ATOZ Tubing Services was established in 2013. We are Alberta owned and operated company, based in Sherwood Park. We specialize in thread supervision, inspection, and repair of premium tubular. We specialize in API 5C1 care and use of casing and tubing, along with numerous proprietary thread connections. ATOZ is recognized for our quality and experience. We have the largest crew of veteran technicians in Western Canada, with experience ranging from 10 years to over 35 years in thread inspection services.

- ▶ Inventory control and monitoring
- ▶ Thread identification
- ▶ Casing and tubing sales
- ▶ Post job detailed reporting
- ▶ Hot shot delivery

### We supply essential tools:

- ▶ Stabbing/pulling guides
- ▶ Calibrated Teflon drifts
- ▶ Torque controlled dump systems
- ▶ Safety clamps
- ▶ and much more

## Why is thread inspection and supervision important when running casing and tubing?

Thread supervision minimizes the risk of damaging threads during running or pulling of tubular goods. Thread supervisors inspect the thread for any abnormalities that could affect makeup and ensure that all manufacturers' specifications are followed. Proper running of casing and tubing can prevent re-cuts resulting in measurable cost savings.

## Our Safety Commitment

We take our commitment to safety very seriously. We have developed a comprehensive safety program and strive to maintain an injury and accident-free environment.
